ANTIOXIDANTS

Daily supply of vitamins and minerals are essential for growth, repair and maintenance of the body. Common farming practices and food preparation techniques have lowered the overall nutritional content of the foods we eat.

OneBodē™ Blend offers an exclusive combination of vitamins from 17 foods, patented minerals in the form of amino acid chelates to improve your daily nutrient intake. In addition, Blend is boosted with an antioxidant blend and SOD (body's most powerful antioxidant – Superoxide dismutase) precursors to combat daily free radical damage.

Vitamin complexes from foods contain phytochemicals, coenzymes and cofactors that support their absorption and utilization within the body – far better than synthetic vitamins. Organic amino acid chelated minerals are a superior choice over inorganic minerals such as salt minerals, colloidal and ionic. **
